

## MAJOR ACCIDENT PREVENTION POLICY

Flexipol, cognizant of its responsibility in relation to the prevention of major accidents, has committed itself to the preservation of the environment, health, and security of all who work in the organization, the facilities, and the surrounding community.

The company has implemented a management system of security and prevention of major accidents which guarantees the continuous assessment and control of risks involving dangerous substances, the periodic verification of processes and procedures, the monitoring of performance and the evaluation of the efficacy and the fulfillment of the defined objectives in the scope of the prevention of major accidents.

These are permanent references: the fulfillment of all provisions relating to the environment, security, and major accidents, the recommendations of ISOPA (European Diisocyanate and Polyol Producers Association), the promotion and the application of the best management procedures.

In keeping with these guidelines and under the safety management system for the prevention of major accidents, Flexipol is committed to adhere to the following:

### ✦ Employees

The participation, the teamwork, the proactive involvement, the training, and the responsibility of all of our employees are the determining factors in the prevention of major accidents.

The security of each person, and the protection of their environment is the shared responsibility of the entire organization.

### ✦ Suppliers

Flexipol is committed to present to all of its actual and potential suppliers aware of the **Major Accident Prevention Policy**.

### ✦ Identification of Dangers and Risk Control and Evaluation

Flexipol considers that the identification of dangers, the evaluation and control of risks involving dangerous substances, in both its current activity and in the involvement of new projects, is a fundamental guide line in the prevention of serious accidents.

### ✦ Emergency Response

Flexipol ensures planning and emergency management as well as information to the surrounding community.

### ✦ Continuous Improvement

Flexipol is strongly focused on the evolution of the quality of the performance within the organization along all levels, and is always continuing to improve. We have established programs and objectives of improvement whose developments are continually kept up with and revised.

Flexipol commits itself to have available all means necessary (human, technology, financial) to establish, implement, and maintain the **management system of security for the prevention of major accidents**.

The **Major Accident Prevention Policy** is communicated and implemented at all levels of the organization. It is reviewed annually, ensuring an effective management system for the security and prevention of major accidents.
